OVERVIEW

“Fera” is the debut EP of Italian one man band Ultio. Furious riffs, inhuman vocals, sinister melodies: uncompromising Black Metal for Swedish Black Metal fans and much more! A blend of blast beats from the Marduk and Dark Funeral school, sick riffs as in Carpathian Forest or Gorgoroth and some influences from the “modern classics” as Watain and 1349, just to name a few.

The music is written and recorded in an improvisational way: instinct with no filters. A raw incarnation of black metal which blends several atmospheres with a personal touch. Previously released as a demo (April, 2018) “Fera” has been remastered and distributed on Digipack CDr and Digital by Brucia Records, a newborn Italian independent label focused exclusively on handcrafted limited editions.
