## **OVERVIEW**

“Worship terror” seems to come straight from the late 90’s: essential, cold and rough. Haternal is that kind of band carrying on black metal tradition with a contemporary aesthetics and without disruptive elements. Repetitive mid-tempos balanced by sudden accelerations and sinister atmospheres are the key points of this four-track EP. For fans of Darkthrone, Craft, Carpathian Forest.

The four songs of the EP were part of an incomplete demo, originally recorded in 2009. Ten years later the original tracks have been taken, partially rearranged and completed in the missing parts. In about 20 minutes Haternal shows a dark palette in which black metal, doomish tones and black'n roll riffs live together.
