OVERVIEW

Dissonant guitars, the voice of an inner monster, horror-filled samples, a bass that kicks your face. If you are searching for a nightmare, you're in the right place.

Dominated by mid tempos, this 38-minute trip is going to drive you through a decrepit world made by blackened experimental doom metal, industrial, noise, disease and fear.

This **special edition on cassette tape** wants to celebrate this vision with an insane mini poster, a pin and an acid green cassette in a black plastic bag. An unreleased bonus track completes this very limited edition.
